PROFESSIONAL SUMMARY

Results-driven Software Engineer and Mobile Application Developer with 1+ years of hands-on experience specializing in building high-performance, cross-platform Android and iOS applications using Flutter and Dart, alongside robust Java backend services. Proficient in state management (Provider, BLoC), RESTful API & WebSocket integration, local storage caching, QR code workflows, geofencing, and AI/LLM integration (Gemini AI, RAG). Demonstrated history of engineering industrial TV dashboard systems, real-time maintenance applications, and optimizing system efficiency by 20%.

WORK EXPERIENCE

Intellisync Company | App Developer (Flutter & API Integration)

March 2025 – Present

Remote Internship

India

- Engineered **TV Dashboard Apps**, a comprehensive production telemetry and monitoring system for garment & textile manufacturing tracking Cutting, Stitching, and Finishing modules.
- Implemented secure RESTful API integrations with **auto-rotating screen schedules** and offline-first cache resilience using **SharedPreferences** for seamless 24/7 factory floor operation during network drops.
- Delivered responsive cross-platform Flutter builds supporting **Android, iOS, Web, Windows, macOS, and Linux**, custom-optimized for large industrial TV display environments.

Appwars Technologies Pvt Ltd | Java Developer Trainee

June 2022 – September 2022

On-site Internship

Noida, Uttar Pradesh, India

- Developed modular backend components using **Java and Object-Oriented Design (OOP)** principles, establishing clean, reusable code architecture.
- Refactored legacy Java modules and database queries, increasing system processing efficiency and throughput by **20%**.
- Participated across full Software Development Life Cycle (SDLC) — from requirements analysis and architecture design to unit testing, code review, and deployment.

KEY PROJECTS

Perplexity Bot App // Real-Time AI Chat | Flutter, Dart, FastAPI, Google Gemini AI, WebSockets, RAG

github.com/kilwish1997

- Built a cross-platform mobile AI assistant in Flutter featuring Markdown rendering, skeleton loading states, and fluid UI.
- Developed a high-performance **FastAPI backend** utilizing **WebSockets** for real-time bidirectional token streaming with Google Gemini AI and implemented **RAG (Retrieval-Augmented Generation)** using cosine similarity algorithms to ground answers in relevant sources.

HR & Time Management System // ESS Mobile Suite | Flutter, Dart, Geofencing, GPS APIs, REST APIs

github.com/kilwish1997

- Engineered an enterprise Employee Self-Service (ESS) app streamlining field-staff attendance, leave workflows, and digital pay slip access.
- Implemented **real-time GPS geofencing** for verified, tamper-resistant clock in/out tracking with interactive analytics dashboards.

Machine Maintenance App // Supervisor & Mechanic | Flutter, Dart, QR Scanner, REST APIs

github.com/kilwish1997

- Engineered a mobile breakdown tracking app for factory supervisors & mechanics, enabling instant **QR-code machine scanning**, ticket logging, and real-time repair lifecycle management.
- Built mechanic dispatch workflows, spare parts replacement logging, and **downtime analytics dashboards** to minimize plant equipment idle time.

Café Management Desktop Suite | Java, Java Swing / JFrame, MySQL, JDBC, NetBeans

github.com/kilwish1997

- Created a full-featured desktop management system with staff authentication, table-side order routing, real-time inventory ledger, and automated sales reporting.

TECHNICAL SKILLS

Mobile & Frameworks:	Flutter, Dart, Android & iOS App Development, Cross-Platform Builds (Desktop/Web/Mobile), Responsive UI/UX
State & Architecture:	Provider, BLoC, GetX, Clean Architecture, MVC/MVVM, Object-Oriented Programming (OOP), SOLID Principles
Languages & Backend:	Java (Core Java), Python, JavaScript, FastAPI, RESTful APIs, WebSockets, JSON Parsing, HTTP Client
Databases & Storage:	MySQL, SQLite, SharedPreferences, Local Caching, JDBC, ACID Transactions
Specialized & Mobile APIs:	QR Code & Barcode Scanning, Camera APIs, Geofencing & GPS APIs, Google Gemini AI Integration, RAG (Cosine Similarity)
Developer Ecosystem:	Git, GitHub, Android Studio, VS Code, NetBeans, Postman, Linux/Unix, SDLC Methodologies

EDUCATION

Bachelor of Technology (B.Tech) - Computer Science & Engineering | MVN University | **CGPA: 7.5**

2020 – 2024

Senior Secondary (Class XII - CBSE) | JD Public School, Palwal | **Score: 70%**

2018 – 2020

Secondary School Examination (Class X - CBSE) | JD Public School, Palwal

2017 – 2018
